## **DETAILED ACTION**

### ***Reissue Applications***

1. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
2. The reissue oath/declaration filed with this application is defective because it fails to identify at least **one** error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The reissue declaration must identify a single word, phrase or expression in the specification or in an original claim, and how it renders the original patent wholly or partly inoperative or invalid.
3. Claims 1-16 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

4. Claims 1-16 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d

Art Unit: 3743

1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In claim 1, the following omitted/broadened claim limitations: “integrally formed” (line 34); “glossy” (line 36); and “a width equal” (line 37) are considered to be subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In claim 10, the following omitted/broadened claim limitation “glossy” (line 34) is related to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of

Art Unit: 3743

35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filling of the present reissue application.

In claim 13, the following omitted/broadened claim limitations: “integrally formed”; “glossy”; and “a width equal” (note original claim 3 of S.N. 08/881,848) are related to subject matter that applicant previously surrendered during the prosecution of the application.

Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filling of the present reissue application.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 16 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 3743

The examiner can find no basis in the specification as filed to support the subject matter in lines 2-3 of claim 16 requiring that each of the circular discs has a diameter **larger** than that of the striking wheel. A transversal of this rejection must specifically point out what portions of the original filed disclosure upon which applicant relies on to support the claim.

7. Claims 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, there is no proper antecedent basis for "said top wall" in line 32.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fang, Zellweger, Jon, Huang, and Chung are cited to show examples of safety lighters.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James C. Yeung whose telephone number is (703) 308-1047. The facsimile phone number for this Art Unit is (703) 308-7764.
